POWERED BY THE VENTURE CENTER

**CRiskCo, Brisbane, Australia**

CRiskCo introduces automated AI-based onboarding and underwriting technologies to banks, governments, lenders and credit providers applying credit to SMEs.

**Agora, New York, N.Y.**

Agora helps banks enhance their legacy payment platforms (without replacing them) for a better user experience.

**Teslar by 3E, Fayetteville, Ark.**

Teslar is designed from the ground up to save time, improve the accuracy of data and increase efficiency by making information more accessible for institutions of all sizes.

**Adlumin, Alexandria, Va.**

Adlumin provides a cost-efficient, easy-to-use, and simple-to-integrate cloud-native security incident and event management solution with artificial intelligence and machine learning, custom-built for the financial sector.

**Gerald, New York, N.Y.**

Gerald provides an opportunity for community banks to generate significant non-interest-based revenue by offering personal and commercial lines of insurance to their customers. Gerald's turnkey solution enables banks to embed a widget on their website to facilitate seamless quoting and purchase of insurance policies.

**KapitalWise, New York, N.Y.**

KapitalWise offers an AI platform that allows financial institutions to interact with their customers at scale. It uses machine learning to better predict when a customer is a good candidate for a particular product, or when they should be nudged to save, invest or pay down a loan.

**Botdoc, Monument, Colo.**

Botdoc provides the ability to remote real-time collect document, reducing employee and call center touch points and the average time an employee spends on a per-transaction basis. This decreases costs, processing timelines and operational friction while increasing convenience and security.

**Sou Sou, Washington, D.C.**

Sou Sou is a smart, social banking account that banks can offer customers who want to save and build strong credit with peers. Banks license Sou Sou technology to attract low-cost deposits and credit-ready borrowers in a secure and cost-efficient way.

**MK Decision, San Diego, Calif.**

Simple, beautiful borrower experiences designed to optimize conversions — drop them easily into your existing website. MK's loan origination system provides technology-driven efficiency via credit bureau and core processor APIs. Enjoy a better lending experience with automated credit decisions and data-driven fraud prevention.

**Vetter, New York, N.Y.**

Vetter's mission is to empower community financial institutions with the technology needed to grow profitably in an ever-evolving digital world.
