SMALL BUSINESS LOAN DATA COLLECTION RULE

TAX INCENTIVES FOR COMMUNITY BANK LENDING

ICBA supports the creation of new tax credits or deductions for community bank lending to low- and moderate-income individuals, businesses, and farmers and ranchers. CANNABIS BANKING

As more states legalize cannabis for medical and/or recreational use, it is critically important for public safety that cannabis-related businesses, as well as those businesses that serve them, have access to the traditional banking system, rather than operate exclusively in cash. POSTAL BANKING

ICBA opposes proposals to allow the U.S. Postal Service (USPS) to offer financial products and services. Postal banking would distract the USPS from its core mission of delivering letters and packages, putting its financial condition and ultimately U.S. taxpayers at risk. Financial services are best provided in a competitive, private, and free marketplace that openly and efficiently benefits customers.

- » ICBA is launching a series of short pieces outlining our objections to postal banking.

HOUSING FINANCE

Recent amendments to the GSEs' Preferred Stock Participating Agreements (PSPAs) include restrictions on the purchase of second home and small investment property loans as well as loans with certain risk characteristics. These restrictions have a disproportionate impact on smaller lenders and will force them to curtail their mortgage lending business. They will raise the cost of housing, impacting buyers and renters. ICBA is calling on FHFA and Treasury to stop the implementation of these restrictions and remove them from the PSPAs.
